DETAILED ACTION

Amendment

1. Receipt is acknowledged of the response filed on April 12, 2005. In the amendment,
5 claims 37, 38, and 40 were amended. Currently, claims 2-17, 19-34, and 37-40 remain for examination.

Allowable Subject Matter

- 10 2. Claims 2-17, 19-34, and 37-40 are allowed.
3. The following is the Examiner's statement of reasons for allowance: the claims are directed at a mail processing/sorting system. When a mail piece is received at a receiving post office, an identification code is created for the mail piece and applied to the mail piece. A mail identification file corresponding to the identification code is also created. Post offices or other
15 nodes (in terms of computer network) access the identification file retrievable by the identification code for processing the mail piece. Such concept for processing mail is generally known in the art. As discussed in previous Office Actions(s), and disclosed in previously cited references, a mail processing system utilizing a file containing a collection of the mail piece records is also known in the art (See the Pinstov patent). Pinstov patent provides a file
20 containing a plurality of mail-piece records. Upon careful review of the references and presented claims, it is the Examiner's opinion that the cited references, taken alone or in combinations, fail to suggest or teach a one-on-one correspondence between mail identification code and a corresponding file (not a record in a file) as set forth in the claims.
